EXPERIENCE

Senior Manager – AI/ML | Tredence | Dallas, TX | January 2026 – Present

- Architected and led the delivery of an enterprise Agentic AI platform on Google Cloud, enabling Data Scientists and AI Engineers to deploy AI applications 2–3 days faster through reusable platform services, standardized governance, and automated deployment pipelines.
- Designed and implemented 10+ reusable AI platform services, including AI Gateway, Agent Registry, Tool Registry, Memory, RAG, and Observability, establishing enterprise standards for secure, scalable, and governed AI development.
- Built a production-ready multi-agent platform using Vertex AI Agent Engine, Gemini, ADK, LangGraph, MCP, Cloud Run, BigQuery, and Terraform, accelerating onboarding of new AI use cases while ensuring security, compliance, and operational excellence.
- Led a cross-functional team of AI engineers, platform engineers, and client stakeholders to define platform architecture, technical roadmap, and best practices, delivering a reusable foundation for enterprise-scale Agentic AI adoption.

Lead Gen AI Data Scientist | SAVVYAN TECHNOLOGIES, VERIZON | US, TX, Irving | January 2024 – January 2026

- Developed a Large Language Model (LLM) solution using PaLM and a tree-based prompting algorithm to classify 75K+ documents into clause categories, saving \$2M annually and eliminating the need for 4 FTEs by replacing legacy systems with an in-house solution.
- Built a proof of concept using the multi-agent LangGraph framework (CFO, Supervisor, Critique, and Writer agents) to analyze customer connectivity service usage end-to-end and generate actionable recommendations, projected to deliver \$4.6M in annual savings.
- Designed and deployed an automated Newsletter AI using LangGraph and MCP tools, orchestrating News Gatherer, Critique, and Chief Editor agents to streamline content creation and distribution to 1,000+ stakeholders.
- Created a framework leveraging LLMs to generate synthetic data for secure data handling and model evaluation, supporting the benchmarking of various LLMs and third-party solutions for enterprise use cases.
- Led a team of 5+ data scientists and analysts, driving project execution, aligning on deliverables, and defining development workflows to ensure timely and high-quality outcomes.

Senior Data Scientist | DELOITTE | US, TX, Dallas | January 2022 – November 2023

- Developed an end-to-end time series forecasting system for user-related KPI metrics across wallet payment platforms in multiple markets, enabling data-driven strategy and planning decisions to boost product usage and revenue.
- Built a robust anomaly detection system for KPI metrics reported by 2K+ partners, improving reporting timeliness and reducing 80+ hours of manual effort each month.
- Led cross-functional teams of Data Scientists, UI Developers, and Data Engineers to automate the MLOps pipeline, including data ingestion, cleaning, model development, visualization, and deployment via cloud platforms and Hadoop (Scala-Spark).

Data Scientist & Technical Advisor | PALLADIUM | US, TX, Dallas | October 2020 – January 2022

- Developed a Time Series model to forecast the number of positive HIV & AIDS cases in African countries at Local Municipality level using exogenous factors to benefit 30+ millions patients.
- Led the team of 10+ Data Scientists and Analysts to guide on the deliverables, meet the goals and define the process for development.

Data Scientist | TECHSTAR, VERIZON | US, TX, Irving | December 2019 – May 2020

- Built an AI/ML classification model using 28M+ service records to optimize Verizon's 5G server upgrade planning, delivering \$1.7M in business value.

Data Science Intern | TRUEVIM | US, TX, Lewisville | August 2019 – November 2019

- Developed a Time series ARIMAX and VAR model, which helped to forecast house prices by considering exogenous variables such as Dow Jones, Unemployment Rate, Interest Rate and Consumer Sentiment Analysis.
- Built regression models using Random Forest and Neural Networks for extracted 5+ million raw data by using Beautiful Soup to predict house price and deployed using Flask to create proof of concept API.

Data Science and Analyst | L&T Infotech | IN, MAHARASHTRA, Mumbai | June 2015 – June 2018

- Added 450+ functionalities, 100 suggestions to improve stability and automated daily tasks, which resulted in savings of \$ 12 million, system stability up to 60% and averted 20+ hours of manual efforts on weekly basis.
- Developed predictive ML models for customer purchase propensity and repeat vehicle sales, increasing profitability by 16% and sales by 9%.

EDUCATION

M.S., Business Analytics (Data Science) | The University of Texas at Dallas | Dallas | 2020

B.E., Electronics & Telecommunication Engineering | University of Mumbai | Mumbai | 2015

SKILLS

- Generative AI & Agentic AI (Gemini, Vertex AI Agent Engine, ADK, LangGraph, LangChain, MCP, RAG, Prompt Engineering)
- Machine Learning (Supervised/Unsupervised, NLP, Time Series Forecasting, Anomaly Detection)
- Languages: Python, SQL, PySpark, Scala, FastAPI • Database Systems (SQL/NoSQL) • Statistical & Exploratory Data Analysis • Tableau/Power BI
- Cloud & MLOps (Google Cloud Platform, Vertex AI, BigQuery, Cloud Run, GKE, Docker, Kubernetes, Terraform, Airflow)
- AI Platform & Governance (AI Gateway, Agent Registry, Tool Registry, AI Governance, Model Armor, CI/CD, Observability)

CERTIFICATIONS

IBM Data Science Professional | GCP Professional ML Engineer | GCP Generative AI | GCP Digital Cloud Leader
